

Mohamed Outerbah

Full-Stack Engineer · Next.js · React · Node.js · Express · Expo / React Native

Algeria (Remote) · Open to Contracts & Full-Time Remote

[EMAIL](#) · [PORTFOLIO](#) · [GITHUB](#) · [LINKEDIN](#)

Full-Stack Engineer with 3+ years delivering production-grade platforms for clients across the Netherlands, UK, and USA. Expert in Next.js, TypeScript, and React Native — currently Founding Engineer at Analytics Depot (AI SaaS with 200+ users, competing with Julius & Databox) and under extensive contract at HaulHub, a live logistics marketplace on iOS & Android.

EXPERIENCE

[Analytics Depot](#)

USA · Remote

Founding Full-Stack Engineer 232 users · AI SaaS

Apr 2025 – Present

- One of 4 founding engineers on a live AI analytics platform with 232 registered users — targeting feature parity with Julius (conversational AI analysis) and Databox (KPI dashboards, scheduled reports) by end of March 2026.
- Owning all frontend architecture: custom drag-and-drop dashboard builder, shareable reports with password protection and embed mode, one-click PDF/PowerPoint export.
- Shipped real-time collaboration: WebSocket session sync, user presence system, collaborative chat sidebar, and NL-to-SQL query interface.
- Implemented Redis caching + Celery task queue for async job processing. Built scheduled report UI, threshold alert builder, delivery channel selection, and data source auto-refresh indicators.
- Integrated Apple Auth, Sentry observability (errors + performance), and CI/CD optimization — deployment time: ~30 min → under 5 min.
- Initialized React Native mobile app: dashboard viewing, push notifications, biometric auth, offline caching.
- Platform ships RAG-based document intelligence, AST-sandboxed code execution, multi-format file analysis (CSV, PDF, Excel, images), and database connectors (PostgreSQL, MySQL, BigQuery, Google Sheets, Slack).
- Collaborating with a 6-person cross-functional team across AI/ML, LLMops, NL-to-SQL, and infrastructure.

Full-Stack Developer — Extensive Contract

Live on iOS & Android Jun 2025 – Present

- Building a production Uber-style logistics marketplace with 12+ service categories (truck rentals, skilled labor, agricultural equipment, furniture moving) — live in the Netherlands.
- Architecting a complex multi-role system: Admin (with sub-roles), End Users, Service Providers (freelancers & companies), and Company Employees — each with dedicated dashboards and permission scopes.
- Developed the platform's two most complex services end-to-end: booking flows, real-time tracking, provider matching, and status management.
- Integrated Stripe payments (on-demand, subscriptions, provider payouts). Deployed Dockerized microservices on Hetzner via Coolify.
- Stack: Next.js, NestJS, React Native (Expo), TypeScript, PostgreSQL, Docker, Stripe.

United Kingdom · Remote

Full-Stack Developer

2023 – 2024

- Built a Rightmove-style real estate platform (V1 & V2): tenant dashboard, application tracking, payments history, price drop alerts, interactive map search with full filtering, and Stripe subscriptions.
- Implemented Redis caching, rate limiting, reCAPTCHA v3. Managed full VPS deployment on DigitalOcean independently.

Exclusive Labs

Remote

Web Development Intern

Sep – Dec 2024

- Built a course management system (Next.js + Express) with role-based auth for students, instructors, and admins.

Freelance

Global · Remote

Full-Stack Developer

2022 – Present

- Delivered 6+ production applications for clients in the UK, USA, Netherlands, Japan, and Saudi Arabia. 4.9/5.0 Fiverr rating.

PROJECTS & SIDE VENTURES

DzStore — Shopify-equivalent SaaS for Algerian merchants ·

- Founded and built a full e-commerce SaaS with 50+ active users. Built with Next.js, PostgreSQL, TypeScript — flagship of the Dzeri ecosystem targeting Algerian market digitization.

Khdame — CRM & marketplace for small and medium retail stores ·

- Co-founded and built a CRM suite targeting small and medium retail businesses: desktop-optimized web app, Android app (Expo), and an integrated marketplace with product listings, price filters, and region-based search.
- Built and shipped: real-time push notifications, WebSocket infrastructure, inventory management, statistics dashboard with calendar view, OTP email verification, Google Auth, store image uploads, animations, and Play Store submission.

Munia — Open-source social media · 300+ GitHub stars

- Contributed auth-aware navigation and dynamic UI logic to a Next.js open-source project.

EDUCATION & ACHIEVEMENTS

Master's in Computer Science

ESTIN, Algeria · Expected 2027

ACHIEVEMENTS

Hackathon Winner 2024

1st place · Competitive ideathon · 5+ hackathons participated

TECHNICAL SKILLS

Frontend: React, Next.js (App & Pages Router), TypeScript, JavaScript ES6+, Tailwind CSS

Mobile: React Native (Expo) — iOS & Android, push notifications, biometric auth

Backend: Node.js, NestJS, Express.js, FastAPI, Python, REST API, RBAC

Database: PostgreSQL, Redis, MongoDB, Prisma ORM, Supabase

DevOps: Docker, CI/CD, GitHub Actions, VPS (Hetzner, DigitalOcean), Coolify, PM2

Integrations: Stripe, Google Maps, OAuth, reCAPTCHA, Resend, Sentry, WebSockets, Celery

AI / SaaS: RAG systems, LangChain, NL-to-SQL frontends, real-time collaboration, drag-and-drop dashboard builders, Celery task queues
