

Mohamed Outerbah

Full-Stack Engineer

TypeScript · React · Next.js · Node.js

mohamedouterbah.com | github.com/Mohamed-gp | linkedin.com/in/mohamedouterbah | mohamedterba6@gmail.com

Full-Stack Engineer with 3+ years of production experience shipping web and mobile products used by thousands. Frontend Lead on a production AI analytics SaaS and Founder/Lead Engineer of DzStore, a Shopify-style store builder that grew to 2,000+ merchants and 70+ paying subscribers within 4 months of launch through organic SEO alone.

EXPERIENCE

Full-Stack Engineer (Frontend Lead) | Analytics Depot | AI Analytics SaaS, USA | Remote Apr 2025 - Present

- **Built most of the user-facing product**, as the 2nd-highest contributor on a ~10-person team, owning the frontend across five AI analytics workspaces, dashboards, reporting, data visualization, realtime features, and AI-powered workflows.
- **Developed the data integration platform across 14 sources**, including BigQuery, Snowflake, Databricks, Redshift, PostgreSQL, GA4, Google Sheets, Gmail, Slack, and YouTube, with OAuth2, scheduled syncs, encrypted credentials, and failure monitoring.
- **Shipped the AI/RAG experience**, covering CSV, PDF, Excel, and image analysis with streaming answers, source citations, automated root-cause/forecast/outlier analysis, and LLM cost and reliability observability.
- **Eliminated a 1-3 minute outage on every production deploy**, and brought deploy time from ~30 minutes to under 5, by building into a staging directory, swapping it in atomically, and running PM2 cluster reloads.
- **Made the case for FastAPI over Express for the backend**, since the product is AI-heavy and Python owns the LLM ecosystem; the team agreed and the stack held in production.

Founder & Lead Engineer | DzStore | E-commerce SaaS, Algeria Jun 2025 - Present

- **Grew DzStore, a Shopify-style store builder, from zero to 2,000+ merchants within 4 months of launch**, with 5,000+ products, ~300 orders a week, 13M+ DZD (~\$100K) in delivered merchant sales, and 70+ paid Pro subscriptions, on zero ad spend.
- **Led the product end to end**: features, merchant onboarding and support, payments, and the production infrastructure, turning merchant feedback into shipped releases.
- **Doubled weekly orders (+127%, 128 to 290)**, by shipping one-click Buy Now across every storefront.
- **Designed the multi-tenant architecture**: one Next.js app serves 1,650+ storefronts by routing on the host header, every query is scoped to the owning store, a least-privilege database role with row-level security adds a second wall, and custom domains get automatic HTTPS.
- **Cut marketplace page weight by 80% and server response time by 64%**, from 3.4MB to 675KB and 1.32s to 0.47s, by moving search and pagination to the server and making the slowest SQL query 4x faster; image payload dropped 95%.
- **Boosted Google Search clicks by 780% in 90 days, to 10K+ total and 4K+ in the last 28 days**, with 235K+ impressions and 40K+ monthly visits, through technical SEO across 15,000+ indexed pages, alongside a React Native merchant app and 100+ delivery carriers behind 6 reusable adapters.

Full-Stack Engineer (Contract) | HaulHub | Logistics Marketplace, Netherlands | Remote Jun 2025 - May 2026

- **Engineered the on-demand dispatch system end-to-end**, for a logistics marketplace live on iOS and Android, including nearest-provider matching, competing price/pickup-time offers, an 11-state request lifecycle, per-ride WebSocket tracking, and Stripe escrow with automated cancellation refunds.
- **Designed the B2B fleet and multi-role platform**, spanning 5+ user roles, 12 service categories, and 5 languages with full RTL, then launched the React Native app and production infrastructure with realtime chat, maps, Dockerized services on Hetzner/Coolify, and Sentry monitoring.

Freelance Full-Stack Developer | Global clients | Remote Jun 2023 - Jun 2025

- **Delivered 6+ production applications for clients worldwide**, rated 5/5 across client projects on Fiverr.

Web Development Intern | Exclusive Labs | Remote Sep - Dec 2024

- Created a course management system (Next.js + Express) with role-based auth for students, instructors, and admins.

EDUCATION & AWARDS

Master's in Computer Science, AI & Data Science Expected 2027

ESTIN (Higher School of Computer Science and Digital Technologies), Algeria

- **Hackathon Winner 2024**: 1st place, competitive ideathon.
- **Open-source contributor**: Munia, a Next.js social platform with 300+ GitHub stars (auth-aware navigation and UI logic).

TECHNICAL SKILLS

Languages: TypeScript · JavaScript · Python · SQL

Frontend: React · Next.js · React Native · Redux Toolkit · Tailwind CSS

Backend: Node.js · Express · NestJS · FastAPI · REST · GraphQL · WebSockets · SSE · RBAC

Databases & ORMs: PostgreSQL · MySQL · Prisma · Redis · MongoDB · Supabase

Cloud & DevOps: AWS · Docker · GitHub Actions · Hetzner · Cloudflare · DigitalOcean · PM2 · Caddy · Coolify

AI & Integrations: RAG · LLM APIs · OAuth2/PKCE · Stripe · Paddle · Sentry · BigQuery
