

Mohamed Outerbah

Full-Stack Engineer

TypeScript · React · Next.js · Node.js

mohamedouterbah.com | github.com/Mohamed-gp | linkedin.com/in/mohamedouterbah | mohamedterba6@gmail.com

Full-Stack Engineer with 3+ years of production experience shipping web and mobile products used by thousands. Frontend Lead on a production AI analytics SaaS and Founder/Lead Engineer of DzStore, a Shopify-style store builder that grew to 2,000+ merchants and 70+ paying subscribers within 4 months of launch through organic SEO alone.

EXPERIENCE

Full-Stack Engineer (Frontend Lead) | Analytics Depot | AI Analytics SaaS, USA | Remote *Apr 2025 - Present*

- **Built most of the user-facing product** as the 2nd-highest contributor on a ~10-person team: five AI analytics workspaces, dashboards, reporting, realtime collaboration, and AI-powered workflows.
- **Developed the data integration platform across 14 sources** (BigQuery, Snowflake, Databricks, Redshift, PostgreSQL, GA4, Slack and more), with OAuth2, scheduled syncs, encrypted credentials, and failure alerts.
- **Shipped the AI/RAG experience** for CSV, PDF, Excel, and image analysis, with streaming answers, source citations, and LLM cost and reliability observability.
- **Eliminated a 1-3 minute outage on every production deploy and cut deploy time from ~30 minutes to under 5**, by building into a staging directory, swapping it in atomically, and running PM2 cluster reloads.
- **Removed a ~30-second login failure window after idle periods** by keeping auth key checks warm.
- **Made the case for FastAPI over Express**, since the product is AI-heavy and Python owns the LLM ecosystem; the team adopted it.

Founder & Lead Engineer | DzStore | E-commerce SaaS, Algeria *Jun 2025 - Present*

- **Grew DzStore, a Shopify-style store builder, from zero to 2,000+ merchants within 4 months of launch**, with 5,000+ products, ~300 orders a week, 13M+ DZD (~\$100K) in delivered merchant sales, and 70+ paid Pro subscriptions, on zero ad spend.
- **Led the product end to end**: features, merchant onboarding and support, payments, and the production infrastructure, turning merchant feedback into releases.
- **Doubled weekly orders (+127%, 128 to 290)** by shipping one-click Buy Now across every storefront.
- **Designed the multi-tenant architecture**: one Next.js app serves 1,650+ storefronts by host header, with per-store query scoping, row-level security, and automatic HTTPS on custom domains.
- **Cut marketplace page weight by 80% and server response time by 64%** (3.4MB to 675KB, 1.32s to 0.47s) by moving search and pagination server-side and speeding up the slowest SQL query 4x.
- **Boosted Google Search clicks by 780% in 90 days, to 10K+ total and 4K+ in the last 28 days**, reaching 40K+ monthly visits through technical SEO across 15,000+ indexed pages.
- **Launched the React Native merchant app and integrated 100+ delivery carriers** behind 6 reusable adapters, so merchants book and track shipments from their phone or dashboard.

Full-Stack Engineer (Contract) | HaulHub | Logistics Marketplace, Netherlands | Remote *Jun 2025 - May 2026*

- **Engineered the dispatch system behind a logistics marketplace live on iOS and Android**: requests go to the nearest providers, who compete on price and pickup time, with live WebSocket tracking and Stripe escrow.
- **Opened the platform to B2B fleets**: companies manage their own drivers and vehicles and get payouts split automatically, across 5+ user roles, 12 service categories, and 5 languages.

Freelance Full-Stack Developer | Global clients | Remote *Jun 2023 - Jun 2025*

- **Delivered 6+ production applications for clients worldwide**, owning each one from scoping to deployment and handover, with a 5/5 rating on every Fiverr project.

Web Development Intern | Exclusive Labs | Remote *Sep - Dec 2024*

- Created a course management system (Next.js + Express) with role-based auth for students, instructors, and admins.

EDUCATION & AWARDS

Master's in Computer Science, AI & Data Science *Expected 2027*

ESTIN (Higher School of Computer Science and Digital Technologies), Algeria

- **Hackathon Winner 2024**: 1st place, competitive ideathon.
- **Open-source contributor**: Munia, a Next.js social platform with 300+ GitHub stars (auth-aware navigation and UI logic).

TECHNICAL SKILLS

Languages: TypeScript · JavaScript · Python · SQL

Frontend: React · Next.js · React Native · Redux Toolkit · Tailwind CSS

Backend: Node.js · Express · NestJS · FastAPI · REST · GraphQL · WebSockets · SSE · RBAC

Databases & ORMs: PostgreSQL · MySQL · Prisma · Redis · MongoDB · Supabase

Cloud & DevOps: AWS · Docker · GitHub Actions · Hetzner · Cloudflare · DigitalOcean · PM2 · Caddy · Coolify

AI & Integrations: RAG · LLM APIs · OAuth2/PKCE · Stripe · Paddle · Sentry · BigQuery
